

Client's Name _____ Patient _____ DATE ____/____/____

The Procedure is: _____

Your pet is scheduled for anesthesia. We recommend a pre-anesthetic blood profile to insure that your pet is in a low risk category. State of the Art technology allows us to run safe, accurate blood chemistries minutes before anesthetic induction. These tests resemble the tests your physician would run before you have anesthesia. In addition, these results will serve as reference values should your pet become ill in the future.

Profile #1----- Healthy patients under 6 years of age: Complete Blood Count (Anemia, Cancer, Infection, Clotting problems) BUN (Kidney) ALPK (Liver) Glucose (Sugar) TP (Hydration) ALT (Liver) Creatinine (Kidney) Sodium, Potassium & Chloride

Profile #2-----Patients over 6 years of age and/or Questionable Health Issues: Includes above tests with Cholesterol Phosphorus (Kidney) Bilirubin (Liver) Amylase (Pancreas) ALB (Cancer) Calcium (Cancer)

Feline Leukemia Testing is HIGHLY RECOMMENDED for ALL Cats.

There is an extra charge of \$45.38 (per condition) for Over-weight, In Heat or Pregnant Animals.

PLEASE CHECK YOUR TEST REQUESTS
